

The Earth

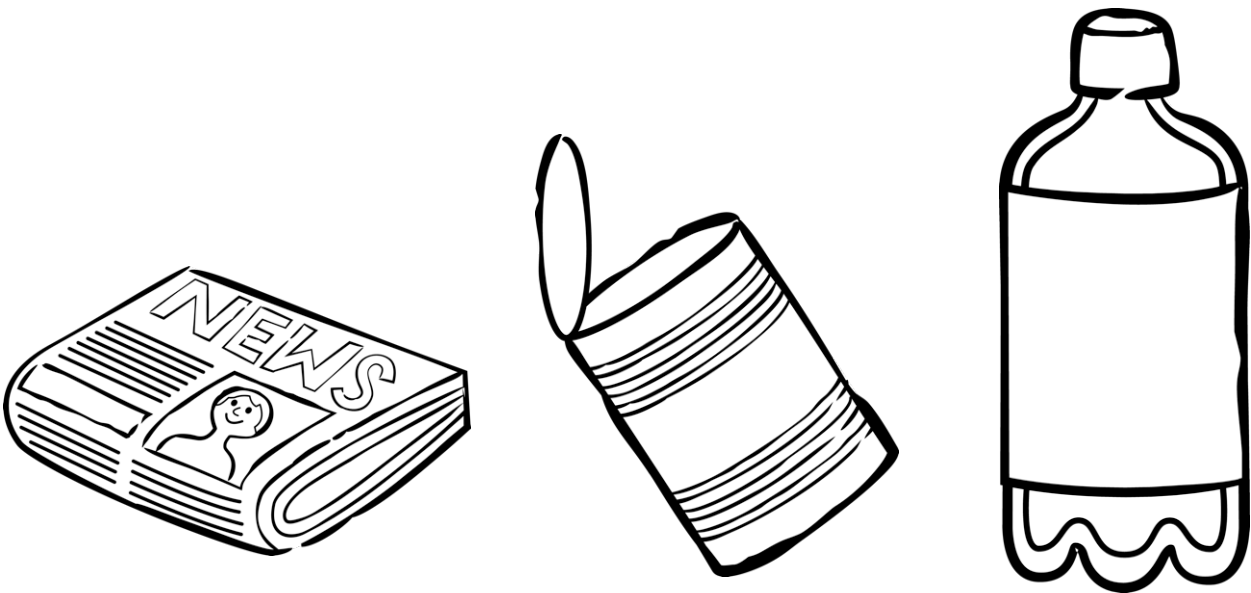

© teachingmama.org

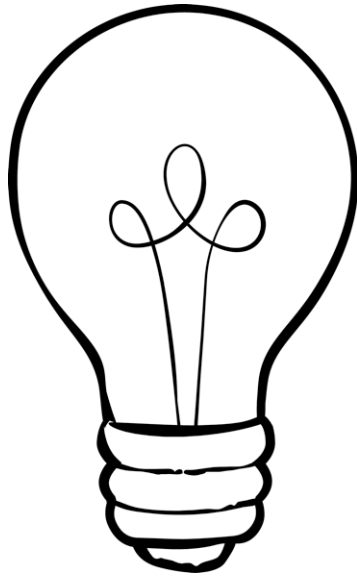

It's important to take care of planet Earth.

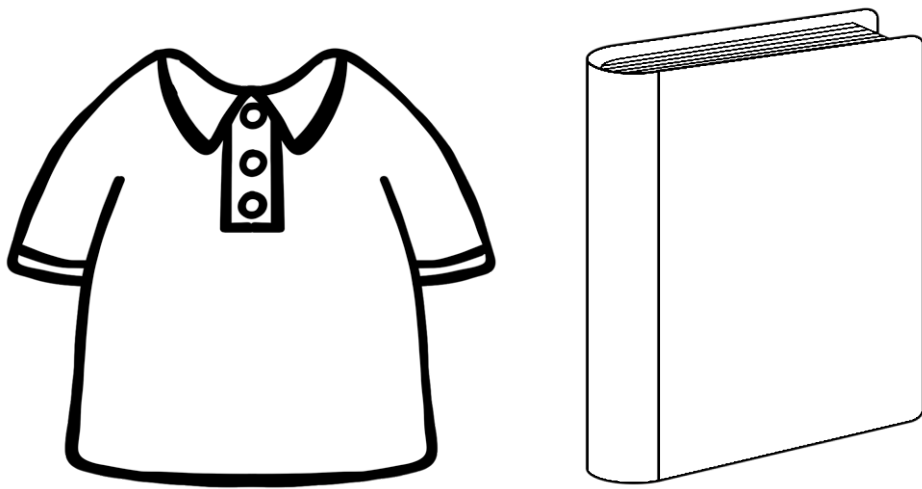

There are many ways to do this. One way is to plant trees, gardens, and other plants.

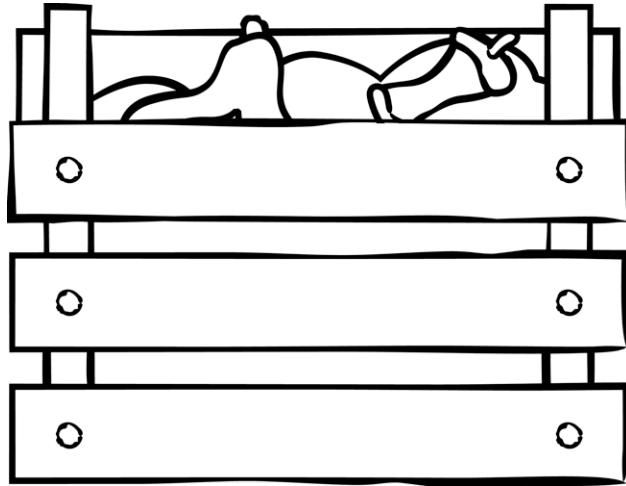

We can also recycle items to be be used again. Some recyclable items are paper, cans, cardboard, and plastic bottles.

We can also reduce things to help Earth. Turning off the lights and faucets when we're not using them helps our environment!

Another thing we can do is reuse items. We can donate clothes and books or reuse bags and boxes.

Composting is great for the Earth. Placing scraps of food in here helps the soil stay rich, which is important for plants to grow.

We can also help by not throwing trash on the ground or in water. This pollutes Earth. How will you help planet Earth?

Thank you for downloading!

Thank you so much for downloading this printable! I hope you find it helpful!

These printables are for personal or classroom use only. That means you cannot copy, reproduce, or change any content from the download, except for your own personal, non-commercial use.

- You may **not** redistribute the contents of my downloads in whole or in part, for any reason.
- Please do not link directly to the PDF online or share this on Dropbox or another shared website.

Make sure to use the most current version of Adobe Reader to avoid any printing problems.
